RX Biliary System™
**A difference
you can feel.™**

RX Biliary System™

A difference you can feel.™

The endoscope shows you the way, but it's your sense of touch that gets you where you need to go. The devices that make up the RX Biliary System have been developed to provide access and control with a sensation of device responsiveness that truly is... *a difference you can feel.*

Over the years, Boston Scientific has earned the confidence and allegiance of customers around the world who have adopted the RX Biliary System for everyday use. Our legacy of success in developing high performance RX biliary devices has enabled us to change the landscape of ERCP procedures. By innovating and refining products, we've put control and access right at your fingertips.

Extractor™ RX Triple-lumen Retrieval Balloon

TWO DISTINCT INFLATION SIZES

- ◆ Each balloon can be inflated to two sizes to accommodate procedural and anatomical requirements
- ◆ Each balloon inflates to two distinct sizes:
 - 9mm inflates to 12mm
 - 12mm inflates to 15mm
 - 15mm inflates to 18mm
- ◆ Helps obviate the need to use an additional balloon

TWO INFLATION SIZES, ONE BALLOON

Two size options in one balloon designed to adapt to anatomical variations

- ◆ Reduces the need to change catheters if an alternative balloon diameter is required for stone retrieval
- ◆ "Squared shoulder" shape at both balloon sizes helps secure stones for retrieval
- ◆ Option of 'injection above, or 'injection below' to facilitate procedural needs and physician preference
- ◆ Low-profile tip engineered to help reduce tip impaction trauma during papillary cannulation
- ◆ Improved injection flow rate

GUIDEWIRE ACCESS AND CONTROL OPTIONS

Three-lumen catheter enables front-loading or back-loading of guidewire

- ◆ 4cm guidewire exchange segment is designed for fast, smooth short-wire exchange procedures
- ◆ Catheter is designed to be easily back-loaded over a guidewire
- ◆ Wire-locking device facilitates multiple sweeps of the duct during stone retrieval by maintaining guidewire position
- ◆ Wire can be locked and unlocked at any time during the procedure
